# Volleyball

**V5M5000**

**MSRP \$85.98**

FIVB Approved, FLISTATEC® Flight Stability Technology, Indoor use, Premium micro-fiber composite cover, Nylon wound, Official size and weight, 2-year warranty, *Patent pending.*

**V5M5000-3N**

**MSRP \$85.98**

Official volleyball of NCAA® Men's Championships beginning in 2012, FLISTATEC® Flight Stability Technology, Indoor use, Premium micro-fiber composite cover, Nylon wound, Official size and weight, 2-year warranty, *Patent pending.*

## OVERCOMING INSTABILITY

FLISTATEC® will bring a revolutionary change to the conventional concept of volleyball and will achieve in creating a game that is more exciting than ever.

We conducted scientific analysis of the air current over the surface of a volleyball.

As suspected, we discovered that the irregular air current around the ball negatively influenced the flight path of the ball. We then continued lab testing, until we succeeded in developing a new technology call "FLISTATEC®", which stands for "FLIGHT STABILITY TECHNOLOGY". With FLISTATEC®, we were able to achieve a stabilized flight path by controlling the air disturbance around the ball through the placement of raised hexagon shaped designs on its surface.

Below you will find a comparison of dropping points of a FLISTATEC® ball and a traditional ball.

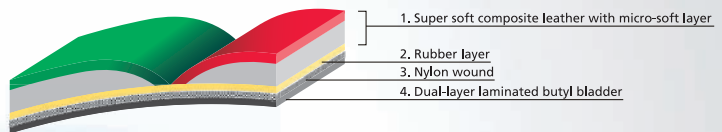

You may observe that the number of irregular flight patterns is significantly reduced with the FLISTATEC® volleyball and that the dropping points are more consistent compared to that of a traditional ball.

### Advanced Volleyball Technologies

Technologies for optimum softness.

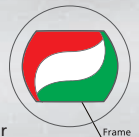

We have added a softer, thicker micro-fiber layer. This micro-fiber layer in combination with the secure nylon wound layer and the uniquely designed hexagon surface layer, increases a player's grip, allowing for a firmer, more accurate overhand pass. As we conducted further field testing, we received positive feedback from top athletes across the world stating the FLISTATEC® volleyball is easier to control in contrast to a traditional volleyball.

V5M5000

### Original Design

Visibility was improved by placing three streamlined panels on each side of the volleyball in a combination with Molten's original color patterns. The color white can be easily recognized in any type of environment. Yet when adding a combination of red and green colors to the streamlined panel design, the FLISTATEC® volleyball visually creates a smoother rotating motion. This original design represents the flame in the letter "O" in the word Molten, symbolizing passion for the game.

**Super Touch

**PF-5000A**

**MSRP \$106.98**

FIFA APPROVED and NFHS Approved, Patented ACENTEC™ cross fusion bonding technology, Enhanced multi-layer architecture, Premium high density latex bladder, Size 5 only, 2-year warranty.

## ACENTEC™ Technology is Making Soccer History

### 1. Cross-Fusion Bonding:

We've replaced traditional hand sewing with a cross-fusion bonding technique for a smooth, seamless surface and quicker, more sensitive ball touch. As a result, ACENTEC™ goes where you want it to go, with minimum absorbency and maximum abrasion resistance.

### 2. Optimized Panel Construction:

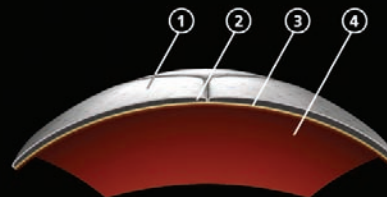

ACENTEC'S™ engineered foam is wrapped in a skin of high-performance polyurethane for finer ball control and excellent bounce. The innovative panel construction provides a high degree of elasticity.

### 3. Enhanced Multi-Layer Architecture:

When designing ACENTEC™, we incorporated advanced lamination technology and adopted the latest mechanical manufacturing techniques. The resulting multi-layer architecture drastically enhances ball roundness, shape retention and durability.

### 4. Molten Grade Latex Bladder:

A Molten-grade latex bladder made from carefully selected natural materials gives ACENTEC™ superior rebound performance.
